WORK EXPERIENCE

Product Intern – Full Stack Development Engineer (Visist AI)

Jan 2025 - May 2025

- Designed and scaled audio annotation features using Video.js, revamped the company website with a modern UI, integrated AI agents across project, and developed automated report generation systems.
- Collaborated with startup team in a fast-paced environment, effectively communicating solutions.

Software Engineer Intern (Endroid USA)

Oct 2024 - Dec 2024

- Worked on CCTV ERP portal using React, Node.js, and SQL for both users and admins. Integrated HLS for seamless live streaming, optimizing real-time video management and system performance.

PROJECTS

Quiz Competetion

jannatfoundationquiz.com

- Designed and launched a web application as a freelancer through the Upwork platform. Collaborated with the client regularly and delivered high-quality results, achieving a 100% client satisfaction rate.
- Utilized React Redux and Integrated third-party libraries and APIs to enhance the website's functionality, such as incorporating Razorpay payment gateway.

Trading Application

tradingwebsite-wine.vercel.app

- Implemented a ReactJS-based paper trading platform to simulate stock trading with virtual funds, with portfolio management. Incorporated TradingView APIs for real-time stock trading experience.

Prompt Sharing Website

nextjs-prompts.vercel.app

- Built a website using NextJS, leveraging its full-stack capabilities to construct both the intuitive frontend experience and the robust backend API, enabling seamless user interaction and data management.

Blockchain Medical DataExchange

- Decentralized data marketplace enabling patients to securely share their medical data with researchers.
- Used smart contracts and IPFS-based data storage, ensuring 100% data security and integrity.
